

A Continuum of Personalized Care Anytime, Anywhere

About AeviceMD

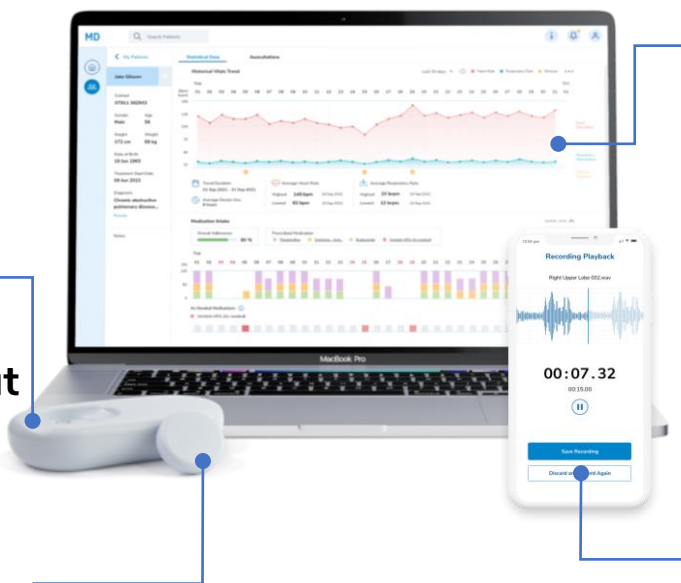

The AeviceMD Monitoring System is a wearable stethoscope designed to provide continuous and longitudinal data to healthcare professionals and users, helping to further research and enable development of management plans that better impact Chronic Respiratory Diseases (CRD).

Monitor and Manage

Monitors Wheeze, Heart Rate, Respiratory Rate **continuously** and **in real time**

Comfort without compromise

Acoustic sensor has **extremely small and lightweight** form factor yet **boasting over 90% accuracy**

Response to Treatment

Access to **longitudinal health data** to monitor response to treatment plans

Remote Auscultations

Allow **objective assessment** of patient's cardiopulmonary health, even through virtual calls

AeviceMD Meets Your Unique Needs

Conduct Virtual Clinical Trials without compromising on the quality of data collected

Easily transferrable data for applications in both clinical and research purposes

Increase Patient's Engagement by personalizing patient experience and treatment plan
